A high-quality approach requires standards. A level playing field requires legally binding standards.

The current collection is far away from the 65%

To bridge the gap, all actors have to collaborate

We have to measure all WEEE Flows

We need to improve the quality of collection and treatment

Improve enforcement

Action is needed - learn from each other

Response to the consultation regarding the study to support the preparation of the Commission's guidance for extended producer responsibility schemes

We issued papers on common methodology for calculation of quantity of WEEE and weight of equipment 'placed on market', a joint call for consistency in calculation of recycling rates, reporting & registration, the WEEE compliance promotion exercise, and our views on plastics and chemical product and waste legislation.

Thank
You
