Irish Manufacturing Research (IMR)

- IMR are a Mid-to-Late Stage TRL Technology Centre supported by Enterprise Ireland and IDA Ireland.
- Established in 2014, incorporating ICMR and i2e2 (industrial networks), to position Ireland as a leader in Advanced Manufacturing.
- Demystify, De-risk and deliver emerging technologies & concepts

IMR 4 Thematic Pillars

Digitisation

Data driven business

Automation & Control

*Self Adaptive
Autonomous Automation*

Design for Manufacturing

*Customer defined
manufacturing*

Sustainable Manufacturing

*Zero Net Carbon
Manufacturing*

CIRCULÉIRE: National Platform for Circular Manufacturing

Vision

- Industry led €4.5 million public-private partnership to accelerate the transition towards a net zero-carbon circular economy in Ireland (2020-2022).

Mission

- De-mystify, de-risk and deliver circular economy (CE) concepts through large scale systems-level innovation and test-beds.

Novelty

- Innovation network (with €1.5m innovation fund) seeking to address the “circularity innovation gap” in Ireland through a nexus approach
- Co-creating innovative solutions with industry - starting with 25 Industry Founding Members and engaging with stakeholders from across the innovation ecosystem

IRISH MANUFACTURING RESEARCH

Novelty of CIRCULÉIRE

- **Co-creating innovative solutions with industry to reduce CO2e and waste:**
 - *through product redesign; business model innovation; industrial symbiosis; material substitution and other circularity strategies*
- **Innovation network fostering cross-sector collaboration**
 - *Increase understanding of what circularity means for your sector*
 - *Identify barriers to implementation of circularity and develop strategies to overcome them*
 - *Develop frameworks, toolkits, training + innovation demonstrations to de-risk & prove value of CE*
- **First major (public-private) systems innovation initiative for circularity – laying foundation for wider transition of Irish economy**
- **Informing national CE policy innovation**

CIRCULÉIRE Key Member Benefits

- Annual Innovation Fund - Calls for Circular Innovation Pilots
- 3 x Thematic Working Groups per annum – e.g. 2020
 - *1) Circular Bioeconomy (w/Irish Bioeconomy Foundation);*
 - *2) Industrial Symbiosis & Closed Loop Production (w/International Synergies);*
 - *3) Circular Procurement (w/IDDEA)*
- Circular Economy Best Practice Guide / Sectoral Reports
- Circular Innovation Programme – Open Call for Start-Ups
- Circularity Training Courses
- Opportunities to feed into:
 - International Standard Development (NSAI / ISO TC323)
 - Irish Policy Innovation e.g. OECD Dialogue

WEEE Ireland 2020 Gap Analysis

2020 Gap Analysis: Objectives & Methods

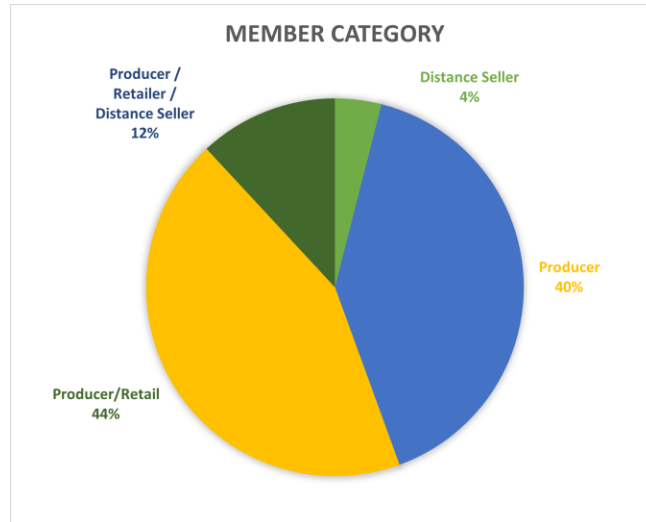

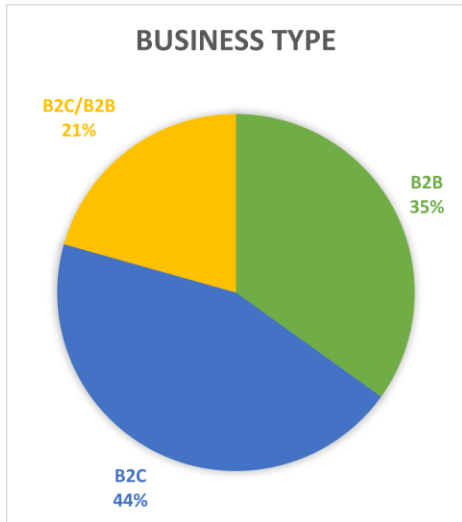

Objectives:

- Provide insight on the current challenges and transition to a Circular Economy for WEEE Ireland and its Members

Key Methods:

- Survey of WEEE Ireland Members Circular Economy
- Material Flow Analysis of WEEE Ireland waste flows

2020 Survey: Circular Economy

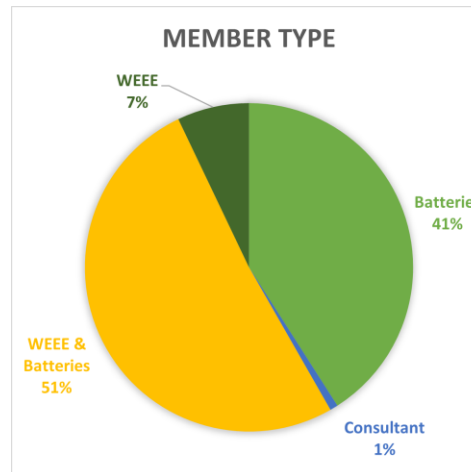

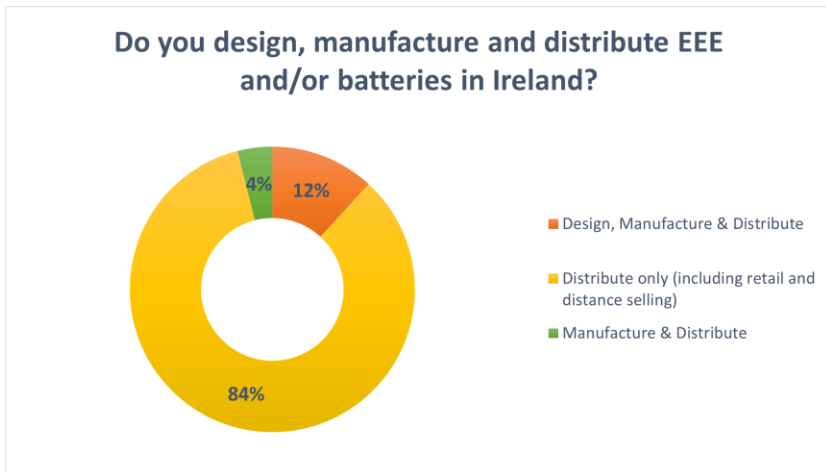

- **Members surveyed:**

- July & August 2020

- **127 Respondents**

- **Survey focus areas:**

- General Information
- Understanding the Circular Economy
- Activities in the Circular Economy
- Challenges in the Circular Economy
- Circular Economy Reporting

2020 Survey: Circular Economy Activities in Ireland

Does your organisation have any existing Circular Economy activities ?

Does your organisation have any planned Circular Economy activities 2021 onwards?

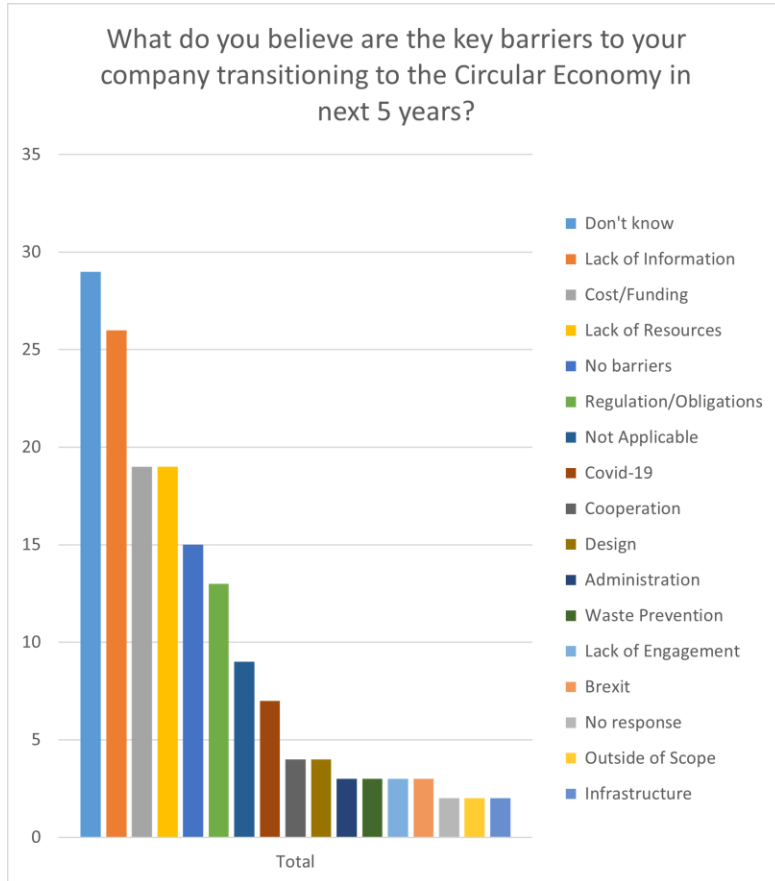

Does your company undertake any test or pilot product studies in Ireland related to EEE/Battery Circular Economy activities?

- **46% of Respondents have a dedicated role for Sustainability/Environmental initiatives & dissemination (Director/EHS/Operations)**
- **14% of Respondents produce a Sustainability/Environmental Report**
- **36% of Respondents were aware of the CE and EU's CEAP**
- **13% of Respondents address CE in annual report or other reporting**
- **11% of Respondents have a CE strategy**

2020 Survey: Circular Economy Challenges

Key Barriers

- Lack of information, resources, funding and regulations/obligations

Most challenging elements to scaling up circular economy activities

- Waste Prevention and Eco-design
- with Repair and Reuse also highlighted...

Preparation for WEEE Re-Use Target

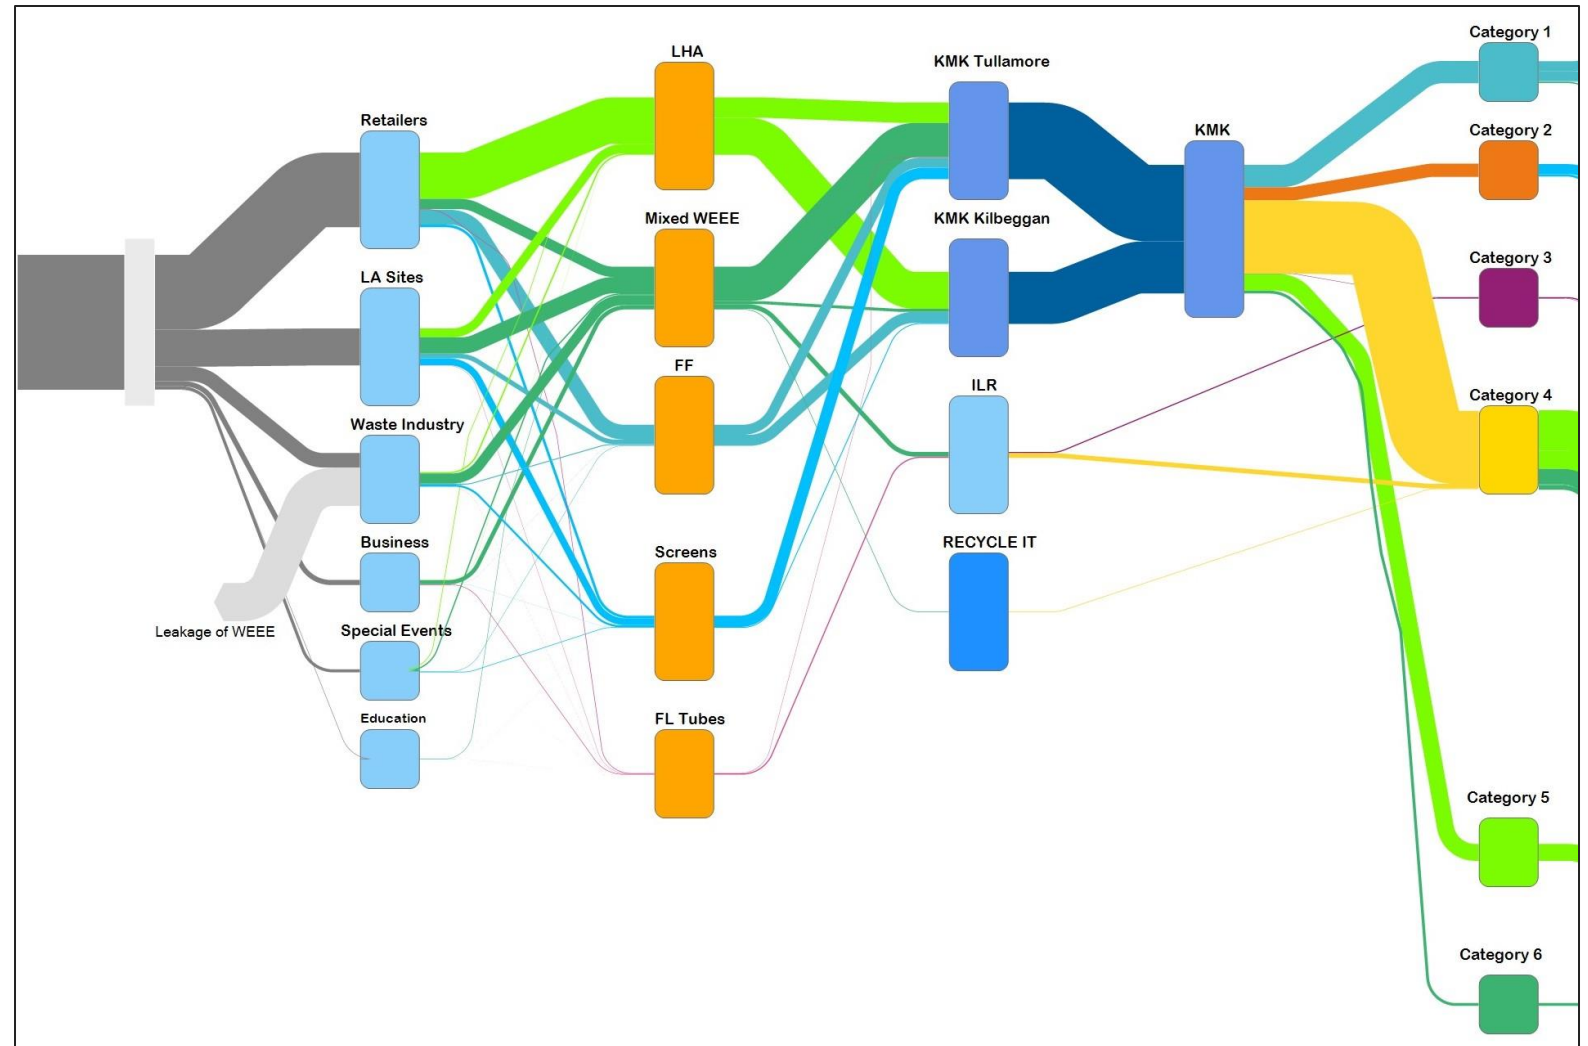

- 64% (81 respondents) stated that they support a target on Producers & Schemes on Preparation for Reuse on WEEE.
- The majority of respondents felt it was their responsibility as an organisation for supporting a target for Preparation for Reuse
- 74% (94 respondents) stated they would be reliant on a Scheme to be able to meet a Preparation for Reuse target
- 25% (33 respondents) stated they could meet the target as Producer on an annual basis.

2020 Gap Analysis – Material Flow Analysis

Mapping waste flows

- Operating context: Ireland's national 65% collection target
- MFA visualises complexity of WEEE flows in WEEE Ireland's scheme
 - Flow of WEEE from Collection to Recycling
 - Highlights leakage

2020 Gap Analysis: Key Messages

- **Scaling circularity requires engagement from every part of the WEEE value chain**
 - From design & manufacturer to distribution / take back – preparation for re-use and end-of-life management
- **Opportunities for bespoke capacity building / upskilling for WEEE sector in Ireland**
 - What it means for their business
 - Accessing circular economy expertise
- **Irish activity in sector regarding circularity exists**
 - Greater visibility required
 - Showcasing to share lessons learnt and practical opportunities
- **Material Flow Analysis creates understanding through visualising complexity of WEEE flows**
 - Highlighting leakage in system
 - Enabling identification of opportunities in light of targets to increase takeback

Thank you!
